

Rep Journal 2024-25

School of Science and the Environment

Briagh Harker

Hi! I am the department rep for Biological Sciences in the School of Science and the Environment. I attended my department rep training on the City Campus.

I have attended the following meetings in my role as a department rep:

- Rep Forum
- Education Council 1 and 2

This is an update as I meant to do this at the end of October, but my schedule got filled fast.

In the month of October, I attended both an Education Council and a College LTQE. These sessions were really relaxed and were more sessions that we could get used to our role. Very insightful and look forward to the next ones to be able to add any ideas and information.
